

BizERP

BIZ ERP Production Management System

End to end business management solutions for SMEs

Get rid of formula errors and spending too much manpower on compliance.

Overview

Manufacturing companies focus on making items from scratch, in bulk and selling it to clients in the relevant sectors. Each company in this sector, focuses on a dedicated item that they manufacture and deliver.

There are some regular challenges faced by manufacturing companies like, handling the stocking of large amounts of raw materials, data analysis, and managing projects and details for each consignment. Without comprehensive cost control, multiple consignments can spiral out of control before anyone even recognizes a problem exists.

Key Advantages

Our BIZ ERP System for the manufacturing industry can help companies take control of their business by

- Better Inventory Control & Management
- Uniformity in the production & execution process.
- MIS reports for quick data analysis
- Centralized access and storage of data maintains transparency and avoids confusion

BIZ ERP is one of the most trusted software solutions for the manufacturing industry available in the country.

Challenges faced by Manufacturing Companies

- Tracking inventory and updating it regularly. Manual maintenance is time taking and prone to errors.
- Maintaining quality of products along with increased profit margin.
